

**Entry:** All competitors that enter the segregated competition area will follow the supplemental facility entry regulations that will include screenings for temperature and symptoms of COVID-19 and agree to follow all CDC, state and local guidelines regarding Covid-19 prevention. After any contact with people outside the competition area, you must report to the screening area before returning to the segregated competition area.

**Paddock:** All trailers and pit areas should be 10 feet apart. To make sure there is enough room, we ask that you park your trailer or set up your paddock space and then move your extra vehicles to a parking area. **Remember the paddock is shared space, be kind to your neighbors so we don't have to ask anyone to move or leave.**

Masks are required when you are in contact with others outside your pit/paddock area. If you are going to visit another rider in their pit or paddock, masks are required if you are within 6 feet of that rider or their crew. **NOTE:** You do NOT have to wear a mask around your pit/paddock when only you, your family and your crew are in your area. Riders do not need to wear masks when wearing their helmet on the track.

Riders meetings will be done at Victory Lane. We ask that rider is the only representative from the team to come to the meeting in person as we will broadcast the meeting over the garage paddock PA to limit the number of people at the meetings. During riders meetings we ask you social distance from one another and if that is not possible, **PLEASE WEAR YOUR MASK!**

If you happen to fall down, the ambulance will only put you in the ambulance if you need medical attention. Otherwise they will check you out and then if you are deemed physically okay, they will have you ride back to the paddock with the crash truck. This helps eliminate the down time required for the ambulance to sanitize the cabin after any patient is placed inside.

**Registration:** Our goal is to limit personal contact to a minimum.

We will use the registration windows to limit contact. (If you must enter the infield registration room for any reason, you must wear a mask.

Each rider will bring and use their own mask in infield registration.

Each rider will be given their own pen, at the end on the line there will be a bucket for the rider to drop the pen in for us to sanitize when registration closes. (Registrars will sanitize their work station with wipes and/or spray anytime they return to their station and before leaving in the evening.)

Each registrar will wear gloves and face mask. ASRA/CCS will provide hand sanitizer for clerks and the racer to use. All staff in registration will be at their own window and either the window or a breath guard between them and the racer. (Please remember to stand 6' apart or wear your mask while waiting in line.)

Once the racer is finished please out the pen in the bucket..

**Tech:** Our goal is to limit personal contact to a minimum.

Each inspector will wear gloves, face mask and have hand sanitizer for them and/or the racer to use.

We will have multiple tech lines approximately 10-12' apart.

Inspectors will strive to maintain 6' separation in the lines waiting to be inspected.

Racer or crewmember will bring a stand to tech with the motorcycle or use the wheel chock stand that ASRA has in each tech line. Racer or crew member will place the bike on the stand and move 6' away from the motorcycle. Then the inspector will evaluate the machines race-readiness. After placing an approval sticker on the machine or notifying the rider of what needs to be addressed, the inspector will move away from the machine and let the racer remove their machine from the tech area.

While we have some specific in-depth procedure changes for the staff, these are the outline we are starting with to mitigate the potential of spreading the virus among racers and staff.

ASRA/CCS management believe these measures would allow us to be safe and in full compliance with existing restrictions but we understand new orders could be issued with immediate implementation that could remove/change procedures or require postponement or cancellation.
